Sintered Stone catalogue

2025-V1

Venus Tiles offers a wide range of unique products designed for various design solutions. The collections at Venus Tiles represent the latest popular trends and include materials such as granite tiles, tempered glass, metal, and handmade ceramics.

Combining art with function, Venus Tiles continuously updates its unique pieces to meet the needs of designers' creativity.

The collections from Venus Tiles express various luxury lifestyles that incorporate art elements.

We always inspire everyone to create something amazing, reflecting their lifestyle, pride, and a masterpiece in their life.

BIG SLAB FEATURES

Extra-Large Slab For Extraordinary Impressions

Seven main sizes: 1600*3200mm, 900*2600mm, 1200*2400mm, 900*1800mm, 800*1600mm, 600*1200mm, 1200*1200mm. The extra-large tiles visually extend the space for an impression of spaciousness and flowing decoration. They are ideal for large spaces, especially public spaces.

High Quality With High Technology

Our advanced pressing techniques result in high density and hardness. We use a world-leading loading process and toughener to provide increased breaking strength. Our panels surpass marble in both physical and chemical properties, as well as weather resistance. They are suitable for use on indoor and outdoor walls and floors.

More Applications To Inspire Creativity

The extra-large super stone panels come in various sizes and can be used in a wide range of spaces, unlike smaller, older products. They can be applied to indoor and outdoor walls and floors, as well as used as cupboard panels, table tops, and countertops, sparking users' creativity.

Authentic Textures With Fine Workmanship

3D high-definition digital technology is used to replicate the authentic textures of marble. Plus a fine touch, delicate gloss, and high stability, they are ideal for spaces of different styles.

ADVANTAGES

Scratch Resistant

This surface is designed to be resistant to both topical and deeper scratches, ensuring it retains its high quality even with frequent cleaning.

Heat Resistant

The material is fire and heat resistant and does not release any toxic substances in the event of a fire.

Chemical Resistant

This material is resistant to both organic and inorganic solvents, sanitizers, and detergents, making it easy to clean. Additionally, the surface and decorative colors are designed to remain intact and do not wash off.

No Color Variation

Ceramic materials are resistant to sun radiation and maintain high color stability, even in extreme weather conditions.

Low Water Absorption

Extremely low water absorption rate makes slim water and frost resistant
