INSTALASI VENUS TILES MOSAICO (Wet System / Tile Adhesive)

1. Pastikan kode atau seri dan tipe yang ada dibalik kemasan sudah sesuai atau sama antara satu dengan yang lainnya. Kecuali untuk mosaik yang customize hal ini agar menghindari terjadinya shading (belang).

2. Susunlah terlebih dahulu mosaik sesuai dengan gambar yang diinginkan (di gelar sebelum terpasang), terutama jika mosaik tersebut adalah tipe customize.

- Untuk aplikasi dinding plesteran, pastikan permukaan dinding tersebut sudah rata (rata jidar) dan tidak kopong.
- Jika permukaan dinding yang sudah di cat, pastikan cat tersebut sudah dikupas bersih terlebih dahulu.

Ukurlah area aplikasi, dan buatlah moulding atau tarikan tali atau kepalaan untuk memastikan kesesuaian ukuran mosaik yang akan diaplikasikan pada area tersebut. Jika terdapat kelebihan ukuran mosaik terhadap bidang aplikasi, diharapkan tidak memotong chip mosaik, bila kondisi tersebut terjadi, gunting jaring pada mosaik tersebut, kemudian jarak nat antara chip mosaik yang satu dengan yang lainnya disesuaikan dengan ukuran bidang aplikasi, misalkan dibuat agak lebar atau menyempit pada setengah area terakhir.

3. Setelah semuanya siap, pemasangan mosaik menggunakan adukan semen instan atau tile adhesive. Untuk tipe mosaik kaca dengan warna terang atau transparan gunakan tile adhesive warna putih. Aplikasikan adukan dengan menggunakan roskam bergerigi (untuk ukuran gerigi dapat dikoordinasikan dengan technical support PT. Venus Ceramica International).

4. Karena sifat adukan semen instan atau adhesive lembut mengering, penempelan pada dinding, gunakan penahan untuk lembaran mosaiknya agar tidak turun (konsultasikan ke pihak technical support).

5. Setelah selesai proses instalasi tunggu 1x24 jam, baru dapat dilakukan proses grouting atau pengisian nat.

*Tidak semua tipe mosaik dapat diaplikasikan dengan wet system, keterangan lebih lanjut hubungi PT. Venus Ceramica International.

Pengisian Nat atau Grouting

1. Tentukan warna grout sesuai jenis mosaik
2. Lakukan grouting secara merata dan padat, ketinggian nat sebaiknya dibawah posisi permukaan mosaik.
3. Bersihkan segera sisa-sisa grout yang tersisa di permukaan mosaik, jangan biarkan sampai mengering.

Catatan :

- Untuk grouting tipe mosaik dengan permukaan tekstur lakukan grouting secara hati-hati jangan sampai sisa grout menumpuk diatas permukaan teksturnya.
- Untuk pemasangan mosaik secara non permanen harap konsultasikan ke bagian technical support PT. Venus Ceramica International.
